

Colorado State Patrol Alamosa, Colorado

Performance Engineering was hired to provide the structural engineering services for the new Colorado State Patrol Office in Alamosa, Colorado. The new structure houses the 911 communication center for the surrounding area and also replaces the existing State Patrol's offices. The new facility is a 8,100 SF single story structure and contains locker rooms, training rooms, offices, call center and other areas for evidence, interviews and an exercise room. Included in this project is a garage structure to house emergency vehicles and also to provide minor maintenance.
